
(a) Rozanov limit, normal incidence
Largest absorbed fraction
Pulse duration (fs)
d = 40 nm
d = 20 nm
d = 10 nm
(b) Static ENZ film, TM, 65°
Absorbed fraction
Pulse duration (fs)
limit for 40 nm
static ITO/Au
(c) Dip follows a chirped probe
Wavelength (nm)
Time (fs)
probe wavelength
absorption dip
probe intensity
(d) Adiabatic estimate, 150 nm chirp
Absorbed fraction
Pump time relative to the probe centre (fs)
switched
best static film
