
(a) The dip follows the chirp
probe wavelength
absorption dip of the film
probe FWHM
Wavelength (nm)
Time from the probe centre (fs)
(b) Spectra, 30 % drop
incident
reflected, best static film
reflected, Rozanov optimum
reflected, switched film
Energy per unit wavelength (norm.)
Wavelength (nm)
(c) Margin over the bound
7.5 nm, 75°
10 nm, 75°
10 nm, 70°
Rozanov limit
largest measured change
lines: adiabatic
markers: full wave
Absorbed fraction minus limit
Largest drop of ω_p (%)
(d) Same spectrum, three cases
Rozanov limit 0.848
0.878
0.572
0.576
Absorbed fraction of the probe
best static film
switched, transform-limited
switched, chirped
